

# PREVENT CORONAVIRUS

## Cleaning, Disinfecting and Hygiene

### GENERAL GUIDELINES

- Follow local public health recommendations related to local infection activity and need for isolation and closing.
- Increase cleaning and disinfection frequency, especially for surfaces frequently touch by residents, patients, guests and employees.
- Reinforce personal hygiene (hand hygiene and cough etiquette) throughout your operation.
- Provide hygiene materials such as tissues and hand sanitizer stations.
- Stock properly applicable disinfectant products.
- Closely monitor employee health. Encourage symptomatic employees to stay home.

- Handwashing sink handles
- Soap dispenser push plates at handwash sink
- Towel dispenser handle at handwash sink
- Trash receptacle touch points
- Cleaning tools
- Buckets
- Telephone keypad and hand set
- Manager's computer

CALL LINDA WITH GFS SERVCO FOR DETAILS AND QUOTE OF A FULL IN SUITE SANITIZION

# 210-777-0410

With the threat of the Coronavirus (CoVid-19) on the minds of all, GFS has partnered with ECOLAB. ECOLAB is the global leader in hygiene, energy technologies, and services that protect people and vital resources in order to educate, train, and implement all CDC-EPA procedures and utilization of chemicals in the prevention of major outbreaks in the work area, buildings, and facilities in our community.

As promised, GFS has always and will continue to provide, at a minimum, hospital grade disinfectants as a general cleaning tool. We will provide a hospital grade atmosphere for all tenants and patrons. We have and will continue training our leadership teams, nightly staff, special teams, and day porters on the correct procedures established by the CDC in the prevention of outbreaks. To maximize effectiveness, GFS is reprioritizing our day porters' daily routine, placing more emphasis on the following: wiping down repeatedly touched surfaces such as, but not limited to; door handles, entryways, railings, elevator keys, faucets, dispensers, toilet flush handles.

As tenants, GFS is available and eager to work with each of you regarding your specific needs and concerns within your workspaces. Currently, we are offering two services:

**Service 1: wipe-down surfaces, treat carpet and flooring (allowing minimum of 5-minute kill time for anti-microbial chemical to activate and then be removed).**

**This service averages .04 cents per square foot.**

**Service 2: aerostatic fogging treatment that is sent into HVAC return vents fogged freely into the air treating airborne pathogens in the air as well as all reachable surfaces. All surfaces will be cleaned using microfiber cloth to remove dried chemical residue.**

**This service averages .07 cents per square foot.**

**Both services as a combined (recommended) will be offered at .10 per square foot.**

In the event of an outbreak within your workspace GFS is prepared with a plan of action to decontaminate. Please contact us through property management to asses.

Please find additional information specific to the Coronavirus attached, and product specific information GFS uses to battle this virus and all others within your facility. Thank you for the opportunity to share measures GFS is taking for you, your tenants, and patrons. Please feel free to reach out to us with additional questions you may have.
